PROFESSIONAL SUMMARY

I am a **Front End Developer** started my journey in 2020. I have a proven track record of developing highly interactive, user-friendly, and visually appealing websites. I am highly skilled in using HTML, CSS, JavaScript, JQuery, React.js, and other related technologies to create responsive and optimized websites that run on all major browsers. My biggest achievement has been creating an **Payslip management system** using html css js and php for a client. I have a keen eye for detail and a passion for technology which helps me to develop innovative solutions for clients. I possess excellent communication skills and the ability to work effectively both independently and within teams.

EXPERIENCE

July 2021 - September 2023

frontend developer

fiverr / pakistan, nawabshah

At Fiverr, Pakistan, I worked as a Frontend Developer for two years. During my tenure, I was responsible for developing user interface designs, implementing them into web applications and ensuring their functionality and efficiency. Additionally, I was in charge of creating new features and maintaining the existing ones. My job included:

- Writing clean, maintainable code
- Developing frontend applications using ReactJS
- Optimizing existing components for better performance
- Creating modern user interfaces with the latest trends and technologies
- Troubleshooting bugs, debugging issues and resolving them in a timely manner
- Collaborating with other teams to develop innovative solutions

EDUCATION

2019 - 2023

Bachelor of Science (BS)

Mehran University of Engineering & Technology / Pakistan, Jamshoro

I have completed my computer science degree recently in November, I have study multiple subjects i.e blockchain, SQL, Data science, Web Technologies, Networking and many more..

CUSTOM

April 2020 - January 2024

Projects

Pakistan, Nawabshah

- I have done many projects some of these are: **Integration of charmatic api** in react website. functionalities: "getting refresh token, handling large data and filtering specific data from api".

- **Payslip Management System:** design complete payment system for usa client. Functionalities: HR or Admin can create payment slip and automatically send to their employees, employees have records of their payments, employees can ask for changes in payment, automation suggestion of employees while choosing from department and positions.
- **Coupon website for wordpress:** client asked to design custom website with landing page and coupon discount page where user can copy coupons to get discount and can go through link.

I also worked with other technologies for learning purpose i.e Flutter ,MERN, java, C++
